HOW

CULTURE EATS STRATEGY FOR BREAKFAST

Peter **DRUCKER**

4 barriers to making data-driven decisions

Number 1:

**Lack of a data-first
culture**

92%

of executives say cultural barriers are the biggest challenge in becoming data-driven.

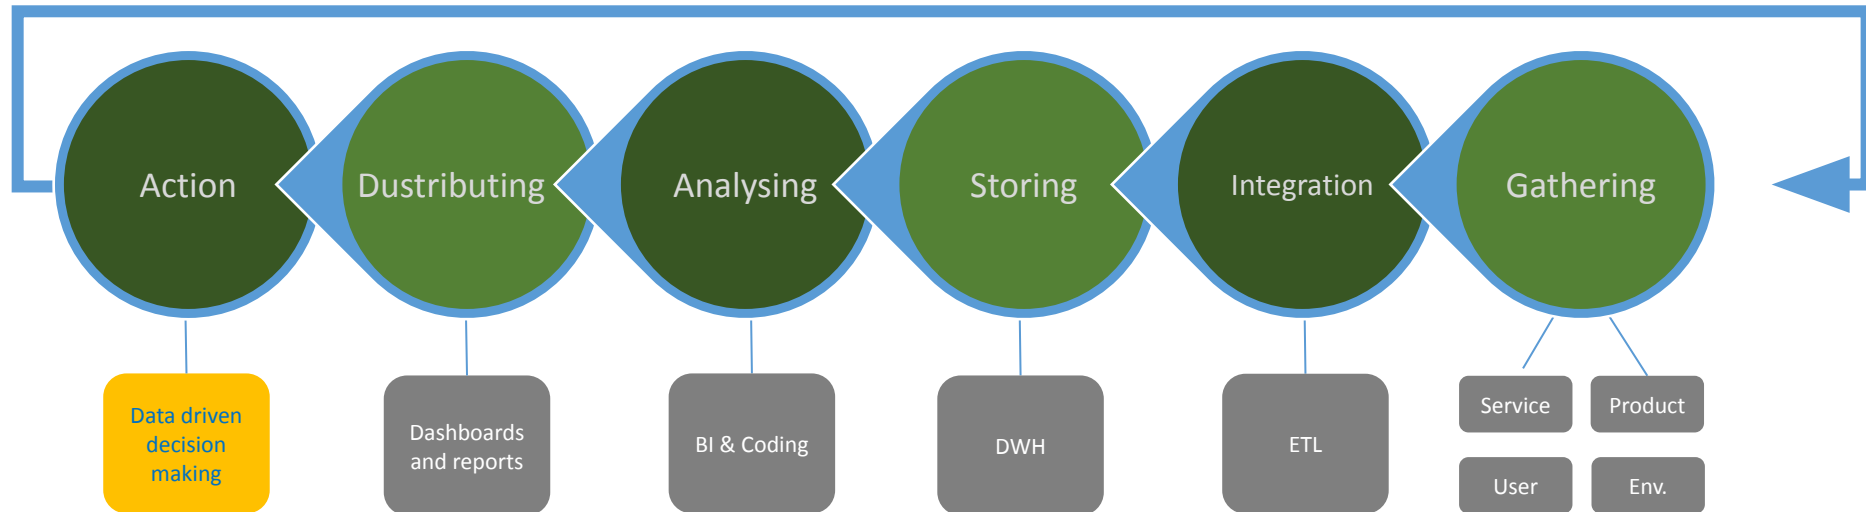

Data-First Culture

Principles

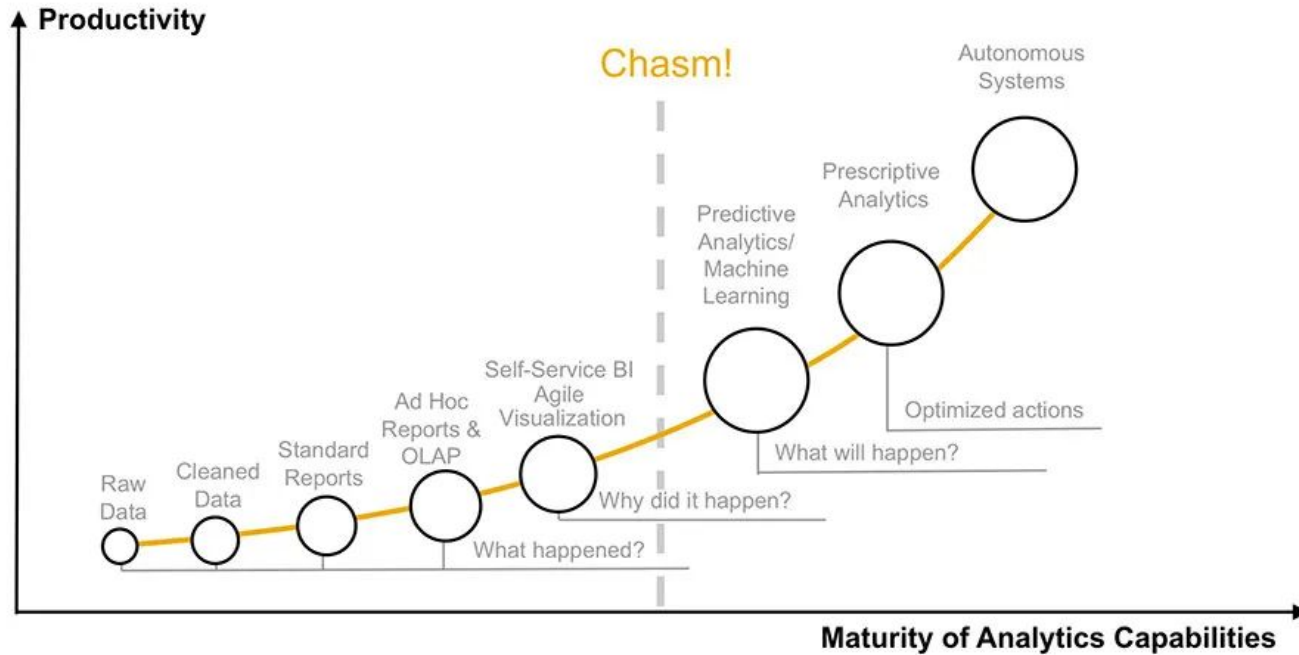

Governance Principle

Insight to action

Data to insight

organization?

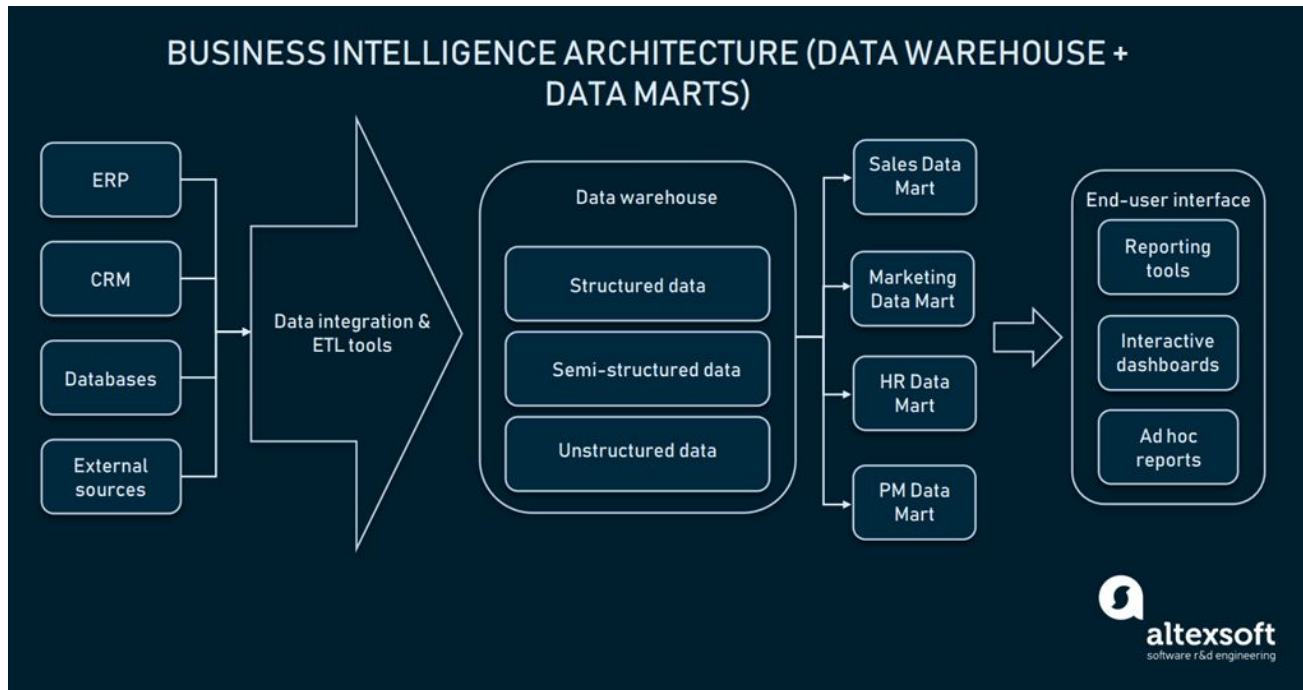

Skills Principle

How ☐

to build a
data-driven
organization?

Tools Principle

How ☐

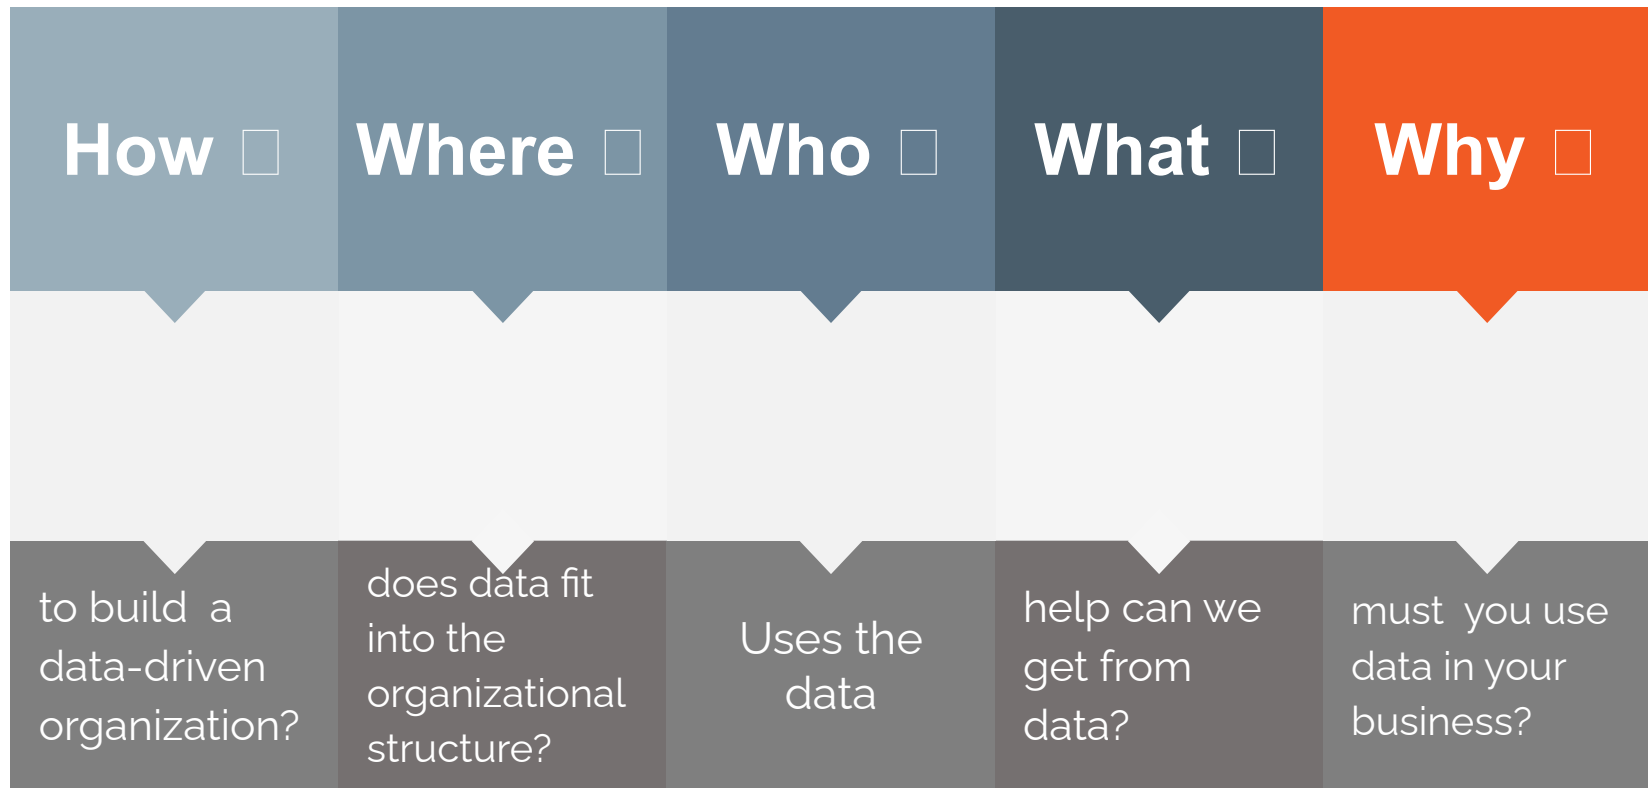

to build a
data-driven
organization?

Accessibility Principle

01	Transparency	Data should be easy to locate and understand. Users should know what data is available and how to access it.
02	Self-Service Access	Enable employees to retrieve the data they need without relying on specialized teams, using user-friendly tools and platforms.
03	Security and Privacy	Accessibility must balance with protection. Sensitive data should remain secure, and privacy regulations must be adhered to.
04	Documentation and Training	Provide clear documentation and training so users know how to find, interpret, and use the data.
05	Inclusivity	Make data accessible to diverse users, including non-technical stakeholders, through intuitive dashboards, visualizations, and simplified formats.
05	Avoid Monopolization	Prevent data from being hoarded by a single team or individual. Accessibility ensures collaboration and broader organizational benefits.
